

Sprint 4 - Creació de Base de Dades

1 Nivell 1

Descàrrega els arxius CSV, estudia'ls i dissenya una base de dades amb un esquema d'estrella que contingui, almenys 4 taules de les quals puguis realitzar les següents consultes:

```
1 • CREATE TABLE companies (  
2     id VARCHAR(10) PRIMARY KEY,  
3     name VARCHAR(50),  
4     address VARCHAR(100),  
5     phone VARCHAR(20),  
6     email VARCHAR(100),  
7     country VARCHAR(20),  
8     city VARCHAR(20),  
9     postal_code VARCHAR(10));  
10  
11 • CREATE TABLE products (  
12     id VARCHAR(10) PRIMARY KEY,  
13     product_name VARCHAR(50),  
14     price DECIMAL(10, 2),  
15     colour VARCHAR(20),  
16     weight DECIMAL(10, 2),  
17     warehouse_id VARCHAR(12));
```

```

19 • CREATE TABLE transactions (
20     id VARCHAR(10) PRIMARY KEY,
21     user_id VARCHAR(10),
22     product_ids VARCHAR(50),
23     amount DECIMAL(10, 2),
24     transaction_date DATETIME,
25     payment_method VARCHAR(20));
26
27 • CREATE TABLE user_data (
28     id VARCHAR(10),
29     name VARCHAR(20),
30     surname VARCHAR(40),
31     phone VARCHAR(20),
32     email VARCHAR(100),
33     birth_date VARCHAR(12),
34     country VARCHAR(20),
35     city VARCHAR(20),
36     postal_code VARCHAR(5),
37     address VARCHAR(100));

39 • CREATE TABLE credit_cards (
40     id VARCHAR(11) PRIMARY KEY,
41     user_id VARCHAR(10),
42     card_number VARCHAR(16),
43     card_type VARCHAR(20),
44     expiry_date DATE,
45     cvv VARCHAR(4));
46

```

En algunos casos tuve que cambiar el tipo de dato

```

49 • alter table transactions
50     modify column amount decimal(10,2);
51 • alter table transactions
52     modify column product_ids varchar(50);
53 • alter table transactions
54     modify column user_id varchar(11);
55 • alter table credit_cards
56     modify column id varchar(11) PRIMARY KEY;
57

```

Para importar los .csv, me salía el error 2068, relacionado a permisos de FILE. Después de muchísimas búsquedas y estos códigos, pude hacer el LOAD FILE. (via cambios en el archivo my.ini)

```

59 • show global variables like "local_infile";
60 • set global local_infile=1;
61 --
62 • show grants;
63 • GRANT FILE on *.* to 'root'@'localhost';
64 --
65 • SHOW SESSION VARIABLES LIKE 'local_infile';
66 • show variables like 'pid_file';

```

Load local infile:

```
70 • LOAD DATA LOCAL INFILE 'C:/Users/gbrlc/Downloads/users_usa.csv'
71 INTO TABLE user_data
72 FIELDS TERMINATED BY ','
73 ENCLOSED BY '"'
74 LINES TERMINATED BY '\r\n'
75 IGNORE 1 ROWS;
76
77 • LOAD DATA LOCAL INFILE 'C:/Users/gbrlc/Downloads/users_uk.csv'
78 INTO TABLE user_data
79 FIELDS TERMINATED BY ','
80 ENCLOSED BY '"'
81 LINES TERMINATED BY '\r\n'
82 IGNORE 1 ROWS;
83
84 • LOAD DATA LOCAL INFILE 'C:/Users/gbrlc/Downloads/users_ca.csv'
85 INTO TABLE user_data
86 FIELDS TERMINATED BY ','
87 ENCLOSED BY '"'
88 LINES TERMINATED BY '\r\n'
89 IGNORE 1 ROWS;
90
91 • LOAD DATA LOCAL INFILE 'C:/Users/gbrlc/Downloads/transactions.csv'
92 INTO TABLE transactions
93 FIELDS TERMINATED BY ';'
94 ENCLOSED BY '"'
95 LINES TERMINATED BY '\r\n'
96 IGNORE 1 ROWS;
97
98 • LOAD DATA LOCAL INFILE 'C:/Users/gbrlc/Downloads/products.csv'
99 INTO TABLE products
100 FIELDS TERMINATED BY ','
101 ENCLOSED BY '"'
102 IGNORE 1 ROWS;
103
104 • LOAD DATA LOCAL INFILE 'C:/Users/gbrlc/Downloads/credit_cards.csv'
105 INTO TABLE credit_cards
106 FIELDS TERMINATED BY ','
107 ENCLOSED BY '"'
108 IGNORE 1 ROWS;
109
110 • LOAD DATA LOCAL INFILE 'C:/Users/gbrlc/Downloads/companies.csv'
111 INTO TABLE companies
112 FIELDS TERMINATED BY ','
113 ENCLOSED BY '"'
114 LINES TERMINATED BY '\r\n'
115 IGNORE 1 ROWS;
```

Creacion de constraints/FK

```

120 • ALTER TABLE credit_cards
121     ADD CONSTRAINT fk_credit_cards_user_id FOREIGN KEY (user_id)
122     REFERENCES user_data(id);
123
124 • ALTER TABLE transactions
125     ADD CONSTRAINT fk_transactions_product_ids FOREIGN KEY (product_ids)
126     REFERENCES products(id);
127
128     -- Entre transactions e credit_cards
129 • ALTER TABLE transactions
130     ADD CONSTRAINT fk_transactions_card_id FOREIGN KEY (card_id)
131     REFERENCES credit_cards(id);
132     -- Relacionamento entre active_cards e credit_cards
133 • ALTER TABLE active_cards
134     ADD CONSTRAINT fk_active_cards_card_id FOREIGN KEY (card_id)
135     REFERENCES credit_cards(id);
136     -- Entre transactions e user_data
137 • ALTER TABLE transactions
138     ADD CONSTRAINT fk_transactions_user_id FOREIGN KEY (user_id)
139     REFERENCES user_data(id);

```

```

140     -- Entre transactions e companies
141 • ALTER TABLE transactions
142     ADD CONSTRAINT fk_transactions_business_id FOREIGN KEY (business_id)
143     REFERENCES companies(company_id);
144
145     -- Creo una tabla intermediaria porque muchos productos pueden estar en muchas transacciones,
146     -- y muchas transacciones pueden comprar muchos productos.
147
148 • create table products_transactions (
149     product_id varchar(10),
150     transaction_id varchar(10));
151     -- Entre transactions_products y products
152 • ALTER TABLE products_transactions
153     ADD CONSTRAINT fk_products_transactions_product_id FOREIGN KEY (product_id)
154     REFERENCES products(id);
155     -- Entre transactions_products y transactions
156 • ALTER TABLE products_transactions
157     ADD CONSTRAINT fk_products_transactions_transaction_id FOREIGN KEY (transaction_id)
158     REFERENCES transactions(id);
159

```

Exercici 1

Realitza una subconsulta que mostri tots els usuaris amb més de 30 transaccions utilitzant almenys 2 taules.

```

129 • SELECT
130     u.id AS id,
131     u.name AS name,
132     u.surname AS surname,
133     u.country AS country,
134     COUNT(user_id) AS transactions
135 FROM
136     transactions t
137     LEFT JOIN
138     user_data u ON t.user_id = u.id
139 GROUP BY id , name , surname , country
140 HAVING transactions > 30
141 ORDER BY transactions DESC;

```

Result Grid				
Filter Rows:

Wrap Cell Content:				
id	name	surname	country	transactions
272	Hedwig	Gilbert	Canada	76
267	Ocean	Nelson	Canada	52
275	Kenyon	Hartman	Canada	48
92	Lynn	Riddle	United States	39

Result 5 x				
Output				
Action Output				
#	Time	Action	Message	
1	10:01:38	SELECT	u.id AS id, u.name AS name, u.surname AS surname, u.country AS country, COUNT(us...	4 row(s) returned

Exercici 2

Mostra la mitjana d'amount per IBAN de les targetes de crèdit a la companyia Donec Ltd, utilitza almenys 2 taules.

```

146 • select
147     c.company_id,
148     c.company_name,
149     cc.iban,
150     round(avg(amount), 2) as avg_amount
151 from transactions t
152 join companies c on c.company_id = t.business_id
153 join credit_cards cc on cc.id = t.card_id
154 where c.company_name = 'Donec Ltd'
155 group by c.company_id, iban, c.company_name;

```

2 Nivell 2

Crea una nova taula que reflecteixi l'estat de les targetes de crèdit basat en si les últimes tres transaccions van ser declinades i genera la següent consulta:

```

CREATE TABLE active_cards AS SELECT card_id, timestamp, declined FROM
transactions;

```

```

with tarjetas_activas as(
    select card_id, declined,
    row_number () over (partition by card_id order by timestamp desc) as partition_time
    from active_cards)

```

Exercici 1

Quantes targetes estan actives?

```

170 with tarjetas_activas as(
171     select card_id, declined,
172     row_number () over (partition by card_id order by timestamp desc) as partition_time
173     from active_cards)
174
175 Select card_id as tarjeta,
176 (case
177     when sum(declined) < 3 then 'Activa'
178     else 'Inactiva'
179 end) as status
180 from tarjetas_activas
181 group by card_id
182 having status = 'activa';
183

```

Result Grid

tarjeta	status
CcU-2938	Activa
CcU-2945	Activa
CcU-2952	Activa
CcU-2959	Activa
CcU-2966	Activa
CcU-2973	Activa
CcU-2980	Activa

Result 8 x

Output

1	11:26:05	with tarjetas_activas as(select card_id, declined, row_number () over (partition by card_id order by timestamp d...	275 row(s) returned

3 Nivell 3

Crea una taula amb la qual puguem unir les dades del nou arxiu products.csv amb la base de dades creada, tenint en compte que des de transaction tens product_ids. Genera la següent consulta:

```

-- ANTES DE LA CONSULTA TENEMOS QUE SEPARAR LOS IDS DE PRODUCTOS, HACER COMO UN "CONCATENACION INVERTIDA"
-- VAMOS A CREAR UNA TABLA TEMPORAL LLAMADA SPLIT_PRODUCTS PARA LOS RESULTADOS DEL PROCESO DE DIVISIÓN DE ID DE PRODUCTOS POR FILAS
-- "RECURSIVE" PERMITE QUE LA TABLA TEMPORAL SE LLAME A SÍ MISMA VARIAS VECES PARA PROCESAR PARTES DE LA COLUMNA REPETIDAMENTE
WITH RECURSIVE split_products AS (
    SELECT
        id,
        TRIM(SUBSTRING_INDEX(product_ids, ',', 1)) AS product_id,
        -- ^ EXTRAER EL PRIMER VALOR DE LA LISTA DE IDS DE PRODUCTO. EN "71, 1, 19" EL VALOR EXTRAÍDO SERÁ 71. "TRIM" ELIMINA LOS ESPACIOS SOBREPANTES.
        TRIM(SUBSTRING_INDEX(product_ids, ',', -1)) AS remaining_ids,
        -- ^ EXTRAER EL RESTO DE LA LISTA DESPUÉS DE ELIMINAR EL PRIMER VALOR. DE "71, 1, 19" EL RESTO SERÁ 1, 19. "TRIM" NOVAMENTE.
        1 AS level
    -- ^ "1 AS LEVEL" ES COMO UN «CONTADOR» PARA INDICAR EN QUÉ NIVEL ESTAMOS -EMPEZAMOS POR EL NIVEL 1
    FROM transactions t
    UNION ALL
    -- ^ COMBINA EL PRIMER PASO ARRIBA CON LOS SIGUIENTES PASOS DE RECURSIÓN, ES DECIR: "DESPUÉS DE HACER EL PRIMER PASO,
    -- ^ SIGUE LLAMÁNDOTE A TI MISMO PARA PROCESAR EL RESTO DE LA LISTA HASTA QUE NO HAYA MÁS COMAS".
    SELECT
        id,
        TRIM(SUBSTRING_INDEX(remaining_ids, ',', 1)) AS product_id,
        TRIM(SUBSTRING_INDEX(remaining_ids, ',', -1)) AS remaining_ids,
        level + 1
    -- EL +1 ACTUALIZA EL CONTADOR DE LA ITERACIÓN PARA INDICAR QUE ESTAMOS A UN NIVEL MÁS

    FROM split_products
    WHERE remaining_ids LIKE '%,%'
    -- UNA CONDICIÓN PARA QUE CONTINÚE LA RECURSIÓN QUE SÓLO SE PRODUCE MIENTRAS REMAINING_IDS AÚN CONTIENE UNA COMA
)

```

Exercici 1

Necessitem conèixer el nombre de vegades que s'ha venut cada producte.

```

218 SELECT product_id Product, count(product_id) 'Total sales'
219 FROM split_products
220 group by product_id;
221
222

```
